Lyon's Stock Products Catalog features our most popular items that we keep in stock for your convenience. Visit lyonworkspace.com to find even more products and available options.

In the interest of safety, Lyon strongly recommends that all products be floor and/or wall anchored as per our installation instructions. Ensuring proper installation enhances the stability and reliability of your storage solutions.

Storage Solutions Since 1901

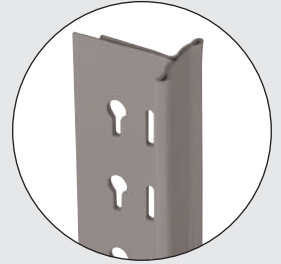

APPLICATIONS

Lyon 8000 series shelving is ideal for smaller items and boxes. Perfect for retail stores and small parts storage.
USE FOR: Light to medium-weight smaller sized items.

Available Widths	36" 48"
Available Depths	12" 18" 24"
Available Heights	84" 96"
Level Adjustability	1-1/2"
Overall Cost	\$\$
Assembly	Moderate

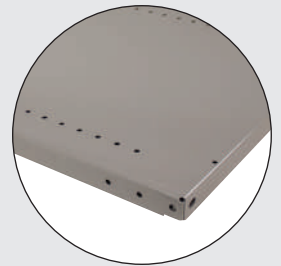

POSTS

T-Posts are roll-formed from 16-gauge steel for maximum strength. Shelf clips allow for rapid repositioning of shelves with 1-1/2" vertical adjustability. Most common applications use 84" high posts.

SHELVES

Shelves are roll-formed with box formations in the front and rear of the shelf for high capacity ratings. Shelves are available in 22, 20, or 18-gauge steel to provide a variety of weight capacity options.

8000 SERIES SHELVING

OPEN OR CLOSED SHELVING

Open shelving allows more visibility to stored products. A cross brace on both sides as well as on the back help stabilize the unit from swaying.

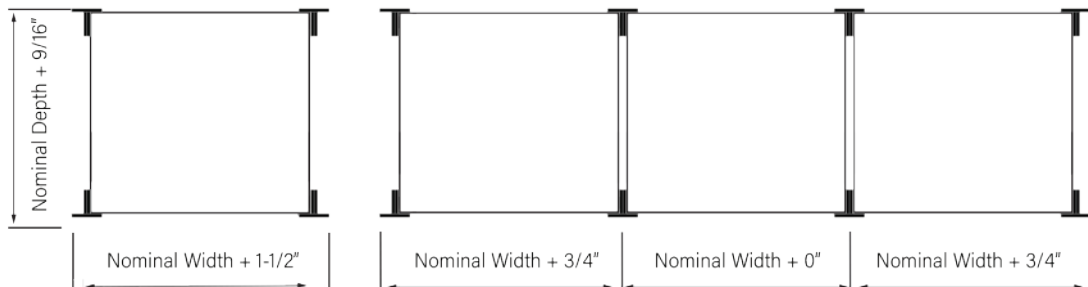

Closed shelving helps to better contain items within a set space. Closed shelving features 24-gauge back and side sheets to completely enclose the shelving unit.

TIP! Backs can be shared when shelving is installed in a back-to-back configuration.

8000 Series Shelf Loads			
Shelf Size	22-Gauge Medium-Duty	20-Gauge Heavy-Duty	18-Gauge Extra Heavy-Duty
36" x 12"	500 lbs	800 lbs	1,100 lbs
36" x 18"	500 lbs	850 lbs	1,200 lbs
36" x 24"	550 lbs	800 lbs	1,250 lbs
48" x 12"	-	500 lbs	750 lbs
48" x 18"	-	550 lbs	900 lbs
48" x 24"	-	500 lbs	500 lbs

**Loads are limited by the ANSI MH 28.1-1997 safety factor of 1.5. Do not exceed uniformly distributed loads shown. Concentrated load points or impact (dropped) loads could cause shelf failure even though the impact load is less than allowable load shown.*

Capacities are based on evenly distributed loads.

ANGLE POST SHELVING | 2000 SERIES SHELVING

CLOSED SHELVING

Lyon closed 2000 series angle post shelving units use angle posts on both front and rear corners. Side panels welded to the posts and solid backs help enclose the entire unit. All pre-designed sections have 20-gauge shelves adjustable on 1-1/2" centers. Shelving units ship unassembled.

Order one starter unit and one or more add-ons to make up a row of shelving.

Starter Units Include:

- 2 Closed Angle Post Upright Assemblies
- 1 Closed Back
- 1 Closed Front Base
- 5 Shelves with Shelf Clips

Add-on Units Include:

- 1 Closed Angle Post Upright Assembly
- 1 Closed Back
- 1 Closed Front Base
- 5 Shelves with Shelf Clips

APPLICATIONS

Drawers in shelving is ideal for storing small parts and medium-sized boxes. Perfect for retail stores and small parts storage.
USE FOR: Light to medium-weight smaller sized items.

Available Widths	36" 48"
Available Depths	18" 24"
Available Heights	85"
Level Adjustability	1-1/2"
Overall Cost	\$\$
Assembly	Moderate

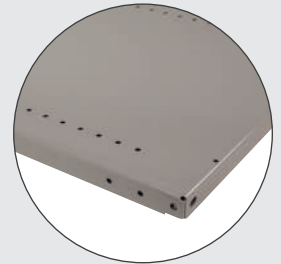

POSTS

Posts are roll-formed from 14-gauge steel for maximum strength. Posts feature 1-1/2" vertical shelf adjustments. Beaded posts are used on front corners to allow for maximum shelf clearance.

SHELVES

Shelves are roll-formed with box formations in the front and rear of the shelf for high capacity ratings. Shelves are 22-gauge and easily adjustable.

DRAWERS IN SHELVING

IDEAL FOR COMBINED STORAGE

Lyon combines 2000 series beaded post shelving and modular drawers to create the perfect storage solution for both small parts as well as bulkier items.

The closed backs and sides of the shelving unit helps to better contain items within a set space. Closed shelving features 24-gauge back and side sheets to completely enclose the shelving unit.

All drawers have a capacity of 400 lbs and fully extend for complete visual and physical access. The drawers easily install into drawer brackets that attach to the shelving posts. Suspension glide rails lock into the brackets, then the drawers slide into place.

Each drawer features an ergonomic aluminum handle. Use the included paper label and plastic shield to help keep the drawers labeled and organized.

2000 Series Shelf Loads		
Shelf Size	22-Gauge Medium-Duty	20-Gauge Heavy-Duty
36" x 18"	500 lbs	850 lbs
36" x 24"	550 lbs	800 lbs
48" x 18"	-	550 lbs
48" x 24"	-	550 lbs

**Loads are limited by the ANSI MH 28.1-1997 safety factor of 1.5. Do not exceed uniformly distributed loads shown. Concentrated load points or impact (dropped) loads could cause shelf failure even though the impact load is less than allowable load shown.*

LAYOUT KITS

Adjustable layout kits are available for both 18" and 24" deep drawers. The steel dividers can be easily moved or removed as needed to accommodate the items stored inside.

Partitions and dividers can be ordered separately. Easily add more dividers to an existing layout kit or combine partitions and dividers as needed to create your own configuration.

DRAWERS IN SHELVING | PRE-DESIGNED UNITS

Lyon drawers in shelving units use closed 2000 series beaded shelving with 22-gauge shelves that are adjustable on 1-1/2" centers. Each drawer includes Layout Kit C with 9 compartments. Drawers have a weight capacity of 400 lbs each. All units are 36" w x 85" h. Shelving and drawer units ship unassembled.

Order one starter unit and one or more add-ons to make up a row of shelving.
 Note: Drawers must be installed in between two shelves set at a fixed position.

Starter Units Include:

- 2 Closed Beaded Post Upright Assemblies
- 1 Closed Back
- 5 Shelves and Shelf Clips
- Modular Drawers with Drawer Brackets

Add-on Units Include:

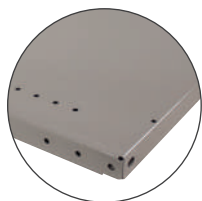

- 1 Closed Beaded Post Upright Assembly
- 1 Closed Back
- 5 Shelves and Shelf Clips
- Modular Drawers with Drawer Brackets

Shelves available in Dove Gray - Drawers available in 5 premier color options.

- Dove Gray
- Vulcan Black
- Red Baron
- Blue Streak
- Monorail Gray

COMPONENTS | DRAWERS IN SHELVING

Build Your Own Shelving with Drawers

Build a shelving unit with drawers to fit specifically to your needs in three easy steps!

Step 1

Choose a 2000 Series Beaded Post Closed Shelving Unit

Choose a unit that is 36" or 48" wide and 18" or 24" deep from page 15. Or build your own Beaded Post Shelving Unit from components on page 19.

Shelving is available in ● DD - Dove Gray

Note: A stationary shelf is required both above and below the Modular Drawers to secure the Drawer Bracket mounting.

Step 2

Choose Number of Drawers and Drawer Sizes. Drawer numbers must add up to match the available drawer bracket height segments (see step 3).

Drawers are available in 5 premier colors. ● Dove Gray ● Vulcan Black ● Red Baron ● Blue Streak ● Monorail Gray

Drawer 36" w x 18" d	No.	Usable Height	Front Height	Drawer 48" w x 18" d
N053618NN000K	05	3"	3-7/8"	N054818NN000K
N063618NN000K	06	3-7/8"	4-5/8"	N064818NN000K
N073618NN000K	07	4-5/8"	5-7/16"	N074818NN000K
N083618NN000K	08	5-3/8"	6-3/16"	N084818NN000K
N093618NN000K	09	6-1/4"	7"	N094818NN000K
N103618NN000K	10	7"	7-3/4"	N104818NN000K
Drawer 36" w x 24" d	No.	Usable Height	Front Height	Drawer 48" w x 24" d
N053624NN000K	05	3"	3-7/8"	N054824NN000K
N063624NN000K	06	3-7/8"	4-5/8"	N064824NN000K
N073624NN000K	07	4-5/8"	5-7/16"	N074824NN000K
N083624NN000K	08	5-3/8"	6-3/16"	N084824NN000K
N093624NN000K	09	6-1/4"	7"	N094824NN000K
N103624NN000K	10	7"	7-3/4"	N104824NN000K

How to Build Your Own Drawers in Shelving: The total of the drawer numbers must add up to the bracket segment total.

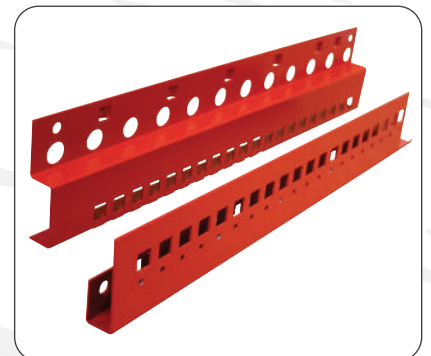

Example:
 N053618NN000K = 05 Drawer
 N053618NN000K = 05 Drawer
 N053618NN000K = 05 Drawer

JMB3615 = 15 Bracket Segment Total

Step 3

Determine the Bracket Height. Bracket segments must match the total segments of the chosen drawers (see step 2). Color of brackets should match the drawers.

36" Wide Shelving Brackets	Bracket Height	Bracket Segment Total	48" Wide Shelving Brackets
JMB3615	12"	15	JMB4815
JMB3622	18"	22	JMB4822
JMB3630	24"	30	JMB4830
JMB3645	36"	45	JMB4845
JMB3660	48"	60	JMB4860

SHELVING WITH DRAWERS | ACCESSORIES

Layout Kits

Pre-designed layout kits allow you to create quick compartments in the drawers to keep smaller items organized. Partitions run front-to-back and attach directly to the bottom of the drawer. Dividers easily slide into place and can be moved or removed as needed.

Partitions and dividers feature a galvanized finish. Installs easily in the field. Standard layout kits are listed below.

Choose layout configuration based on drawer width and depth.

Assembly	Moderate

POSTS

Posts are made of 14-gauge steel for maximum strength. The keyhole slots allow beams to be installed without additional hardware. Posts feature 1-1/2" vertical shelf adjustments. Most common applications use 84" high posts. Posts up to 120" high are also available.

BEAMS

Beams are made of 14-gauge steel. The beam rivets easily slide into the keyhole slots on the upright posts. Each level requires four beams - two width beams and two depth beams.

RIVET RACK

BUDGET FRIENDLY STORAGE SOLUTIONS

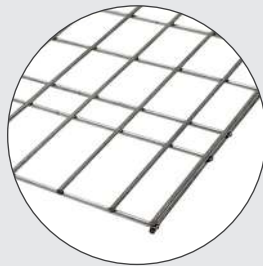

Lyon's boltless rivet shelving is an easy to assemble racking system that is perfect for medium-sized bulky storage. This shelving is a budget friendly option for light to medium-duty applications. It is perfect for use in offices and as retail storage.

Both starter and add-on sections with 3 and 4 levels are available in pre-designed setups. You can also build your own custom rack system by getting individual components.

Several decking options are available to customize the rivet rack unit to your needs. Particle board, galvanized wire, duradeck, or solid steel decking is available to fit standard sized racks.

BUILD YOUR OWN

Easily configure your own racking unit.

Posts

Angle posts are used on the ends of a unit or rack row. T-posts should be used in between sections.

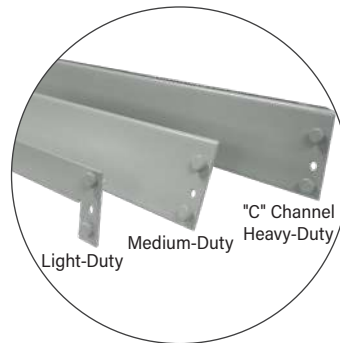

Beams

Medium-duty double rivet beams are the most commonly used. Each level requires four beams - two width beams and two depth beams. It is recommended that the depth beams not exceed 48 inches.

Use the foot plate and anchor to secure your rivet rack unit to the floor. The foot plate fits against the post and attaches to the floor level beam.

● Available In DD - Dove Gray

Beam	Length	Item	Capacity per Pair
Light-Duty Beams (1-1/8"h)	18"	LB18	350 lbs
	24"	LB24	350 lbs
	36"	LB36	350 lbs
	48"	LB48	250 lbs

Assembly	Easy

WELDED UPRIGHTS

Bulk storage rack uprights are made from fully welded 14-gauge steel. Uprights feature horizontal and diagonal bracing that is MIG welded to the post for added stability. Beams can be adjusted on 1-1/2" vertical centers.

BEAMS

Heavy-duty beams are made of 14-gauge steel and feature a unique Z design. A 5/8" step on the beam allows easy placement of decking. Each end of the beam has three studs to engage the upright slots. A fold in lock tab engages to prevent displacement.

BULK STORAGE RACK

VERSATILE STORAGE SOLUTIONS

The slots of the uprights provide a quick and easy vertical adjustment of beams to create optimal storage solutions. There are also no "dead spots" in the upright posts to disrupt your placement of beams along the entire height of the post.

Our unique Z beam design increases the strength and load capacity of the steel beams while also resisting tipping and eliminating wasted space. The three MIG welded beam studs create a secure connection to the posts. The beams adjust on 1-1/2" inch vertical centers. A fold in lock tab engages with the post to prevent accidental displacement.

A variety of decking options are available for different storage types. Use different decking within a unit to create the perfect storage rack for your needs.

Front-to-Back Support

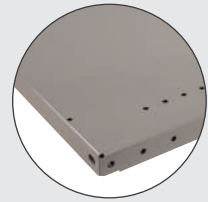

Wire Decking

Particle Board Decking

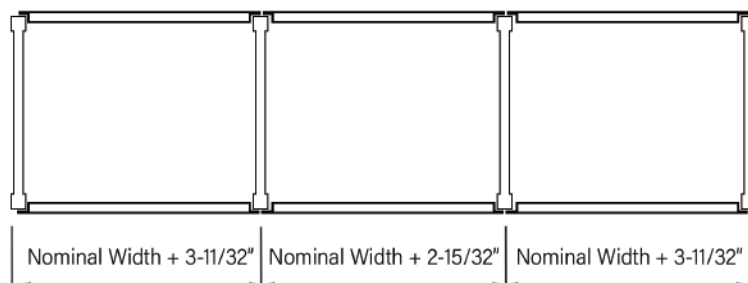

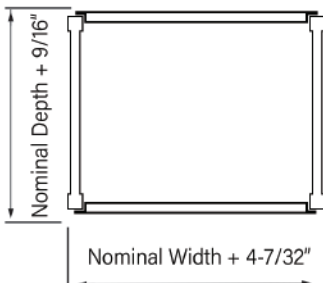

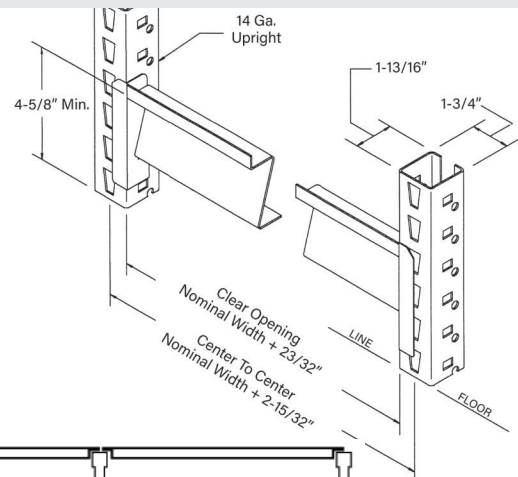

Ribbed Decking

Solid Decking

GROWTH CHART

Connect a bulk storage rack starter unit with several add-on units to create an uninterrupted run of racking. Uprights can be shared between sections to save on floor space. The three studs of the beams interlock with the upright to create a secure connection.

BULK STORAGE RACK | PRE-DESIGNED UNITS

UNITS WITHOUT DECKING

Bulk storage rack units feature fully welded uprights and heavy-duty beams. The slots of the uprights provide a quick and easy vertical adjustment of beams to create optimal storage solutions. Front-to-back supports help minimize beam rotation when supporting heavy loads. Bulk storage rack units ship unassembled.

Levels are adjustable in 1-1/2" increments. Order one starter unit and one or more add-ons to make up a row of racking.

Starter Units Include:

- 2 Welded Upright Assemblies
- 2 Beams per Level
- 1 to 2 Front-to-Back Supports per Level
(based on width)

Add-on Units Include:

- 1 Welded Upright Assembly
- 2 Beams per Level
- 1 to 2 Front-to-Back Supports per Level
(based on width)

PRE-DESIGNED UNITS | BULK STORAGE RACK

UNITS WITH FLAT WIRE DECKING

Bulk storage rack units feature fully welded uprights and heavy-duty beams. The slots of the uprights provide a quick and easy vertical adjustment of beams to create optimal storage solutions. Galvanized flat wire decking is optimal for visibility and sprinkler access. Bulk storage rack units ship unassembled.

Levels are adjustable in 1-1/2" increments. Order one starter unit and one or more add-ons to make up a row of racking.

Starter Units Include:

- 2 Welded Upright Assemblies
- 2 Beams per Level
- Wire Decking Panels for Each Level
- 2 to 4 Front-to-Back Supports per Level
(based on width)

Add-on Units Include:

- 1 Welded Upright Assembly
- 2 Beams per Level
- Wire Decking Panels for Each Level
- 2 to 4 Front-to-Back Supports per Level
(based on width)

Quickly add more levels to your bulk storage rack shelving units with the decking options below. Our unique Z beam design increases the strength and load capacity of the steel beams while also resisting tipping and eliminating wasted space. The three MIG welded beam studs create a secure connection to the posts. A fold in lock tab engages with the post to prevent accidental displacement.

Levels are adjustable in 1-1/2" increments. Mix and match decking types if needed!

Additional Levels Include:

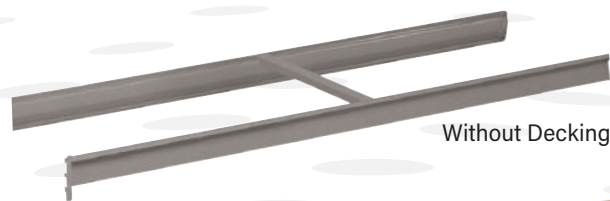

- 2 Beams
- Front-to-back supports
- Decking panel(s) to fit beam width

● Available In DD - Dove Gray

BULK STORAGE RACK | COMPONENTS

Build or add-on to your existing bulk storage rack units with the following components.

Build A Starter Unit:

- 2 Upright Assemblies
- 2 Beams per Level
- 1 to 4 Front-to-Back Supports per Level
- 1 to 4 Decking Panels per Level
(supports and panels based on width)

● Available In DD - Dove Gray

Build An Add-on Unit:

- 1 Upright Assembly
- 2 Beams per Level
- 1 to 4 Front-to-Back Supports per Level
- 1 to 4 Decking Panels per Level
(supports and panels based on width)

Welded Upright	Depth	Height	Item
 w/ Diagonal Brace	24"	72"	64243
	36"		64363
	48"		64483

Post Only (2 Pack)	-	72"	63603
	-	84"	63604
Ladder Brace Only (2 Pack)	18"	-	635182

Bulk storage rack offers an overall capacity of 10,000 lbs per upright. Upright capacities are based on vertical beam spacing no greater than 36" h.

For two-level wide-span applications, insert reinforcing splice channels into the bottom upright assembly posts and fit the second-level upright assembly posts over the channel extensions. The galvanized splice channels provide rigidity at the splice.

TIP! Use the Integration Clip to combine 8000 Series shelves with a bulk storage rack upright. See page 11 for reference.

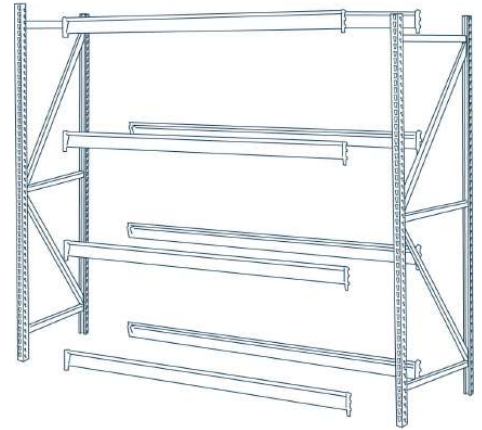

Integration Clip	Qty	Item
 Attaches 8000 Series Shelf to Bulk Storage Rack Upright	1	NF65160

COMPONENTS | BULK STORAGE RACK

Each bulk storage rack level requires two beams and an adequate quantity of front-to-back supports. Capacities shown are maximum safe evenly distributed static loads per pair of beams with indicated number of front-to-back supports.

Front-to-back supports are used to minimize beam rotation under heavy loads. Supports easily fit into slots on the beams - no hardware or tools needed. NOTE: Beams have slots for the maximum possible front-to-back supports but do not always require a support in every slot.

In the interest of safety, Lyon strongly recommends that racks that are 72" or higher be floor and/or wall anchored.

Beams - 2 Pack	Width	Capacity per Pair	Item
 <p>Heavy-Duty Beams 14-Gauge (3-5/8"h)</p>	48"	3,300 lbs	62148

SOLID DECKING

shelves can be rotated to fit width or depth of beam

PARTICLE BOARD & DURADECK | ADDITIONAL DECKING

Easily add your choice of duradeck or particle board decking to your existing bulk storage rack OR rivet rack levels! Decking panels are cut to size to fit your rack level. Be sure to use supports where needed. All capacities are based on evenly distributed loads using the minimum amount of supports recommended. See recommended quantities on page 29 for rivet rack center supports or page 39 for bulk storage front-to-back supports.

Particle Board Decking

Durable 5/8" thick particle board cut to size. Particle board is the most economical option for general storage applications.

Width	Depth	Capacity per Panel		Item
		without Support	with Support	
36"	12"	675 lbs	1,200 lbs	NF72504
	18"	550 lbs	770 lbs	NF72506

	24"	800 lbs	72464

APPLICATIONS

Pallet rack is ideal for warehouses requiring very heavy item storage.

USE FOR: Palletized items loaded with a forklift.

Available Widths	96" 108" 120" 144"
Available Depths	42" 48"
Available Heights	96" 120" 144"
Level Adjustability	2"
Overall Cost	\$\$\$\$
Assembly	Moderate

UPRIGHTS

Roll-formed uprights provide a greater strength-to-weight ratio. Uprights are 100% MIG welded with precision K-brace and heavy-duty cross channel reinforcement for increased strength. Pallet rack uprights conform to the latest standards set by Rack Manufacturers' Institute LRFD Specifications.

BEAMS

Roll-formed beams have a 1-5/8" step for decking and are completely enclosed for clean applications. Studs to engage the tapered teardrop slots in the upright with a compression fit. Beams can be adjusted on 2" vertical centers. An integral safety lock automatically locks into place when the beam is properly seated.

PALLET RACK

HEAVY-DUTY STORAGE SOLUTIONS

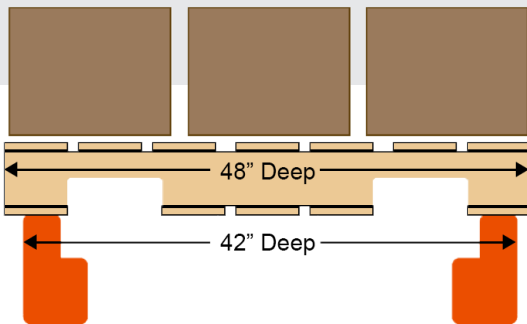

Pallet rack is our most heavy-duty storage rack! These racks are designed to have pallets loaded and unloaded using forklifts. The teardrop design is interchangeable with all major teardrop-style products on the market today. This allows you to easily upgrade or replace existing sections while using some of your existing components.

Lyon's pallet rack units are available with either front-to-back supports or wire decking. The supports are cross bars that help prevent misplaced pallets from falling through. The waterfall wire decking has a 14-gauge support channel for durable storage. Wire decking allows for sprinklers to access all levels of your warehouse racking.

TIP! If updating your existing pallet rack with new components keep in mind that certain components must match each other to ensure the unit is level and secure.

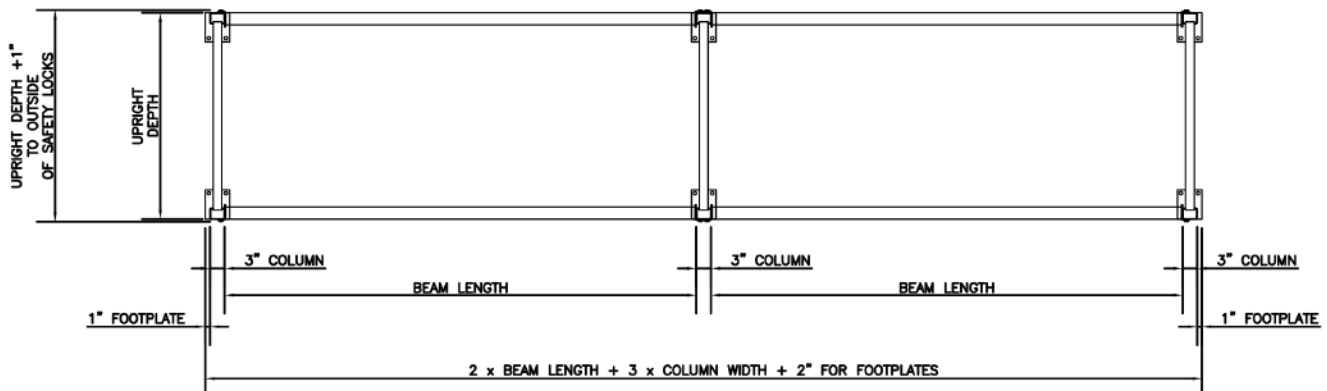

EXAMPLE: A section can use old beams with new uprights, or new beams with old uprights. A section **CANNOT** mix an old and new upright due to varying teardrop heights and it **CANNOT** mix old and new beams due to variations in overall width.

PALLET RACK DEPTH

42" deep Pallet Rack is the most popular! The most commonly used pallets are 48" deep. Using a 42" deep rack allows the pallet to rest on top of both beams without the need for extra decking. This is also referred to as "Ledge Loading."

PALLET RACK GROWTH CHART

PALLET RACK | PRE-DESIGNED UNITS

UNITS WITH FRONT-TO-BACK SUPPORTS

Pallet rack units feature fully welded uprights and medium-duty beams. The slots of the uprights provide a quick and easy vertical adjustment of beams to create optimal storage solutions. Front-to-back supports help minimize beam rotation when supporting heavy loads. Pallet rack units ship unassembled.

Levels are adjustable in 2" increments. Order one starter unit and one or more add-ons to make up a row of racking.

Starter Units Include:

- 2 Welded Upright Assemblies
- 2 Beams per Level
- 2 to 3 Front-to-Back Supports per Level (based on width)

Add-on Units Include:

- 1 Welded Upright Assembly
- 2 Beams per Level
- 2 to 3 Front-to-Back Supports per Level (based on width)

● Lake Green Uprights ● Safety Orange Beams

Wire Decking

Capacities are based on evenly distributed loads.

PALLET RACK | COMPONENTS

PALLET RACK SAFETY RECOMMENDATIONS

Determine actual load requirements as accurately as possible and adhere to rated capacities shown in tables on the following page. Additional precautions should be taken in applications where extraordinary rack abuse is anticipated. For example, when narrow aisles are used for high speed or high inventory turnover operations, Lyon recommends additional rack reinforcement. Rack guards and aisle guidance devices may be advisable – especially at aisle intersections and other vulnerable locations.

BEAM LENGTH

Lyon recommends a **clearance of 4" between palletized loads** – and between loads and uprights. Beams over 120" in length should be tied together with the appropriate front-to-back supports to maintain proper spacing at each storage level.

BACK-TO-BACK CLEARANCE

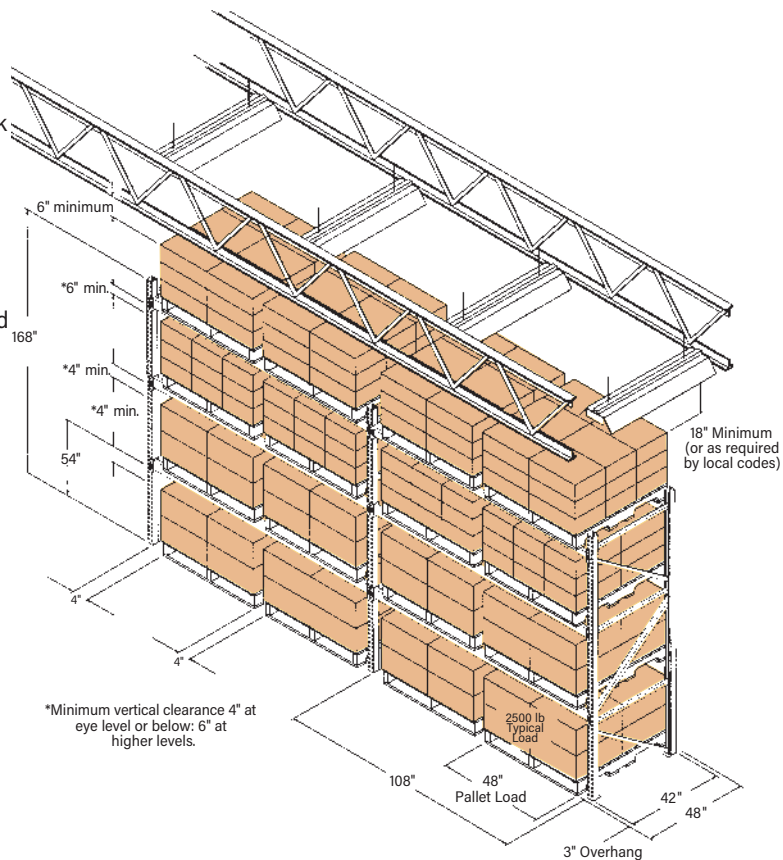

Clearance should be sufficient to accommodate minimum pallet overhang and tolerances – where pallet placement may vary. Additional clearances may be required to accommodate building structures or intermediate sprinkler systems (according to local codes).

INSTALLATION AND ANCHORING

To insure minimum stability standards, racks should be level, plumb and properly anchored.

SEISMIC ZONES

Since requirements vary so widely, we advise you to contact Lyon for assistance on rack projects in high risk seismic zones.

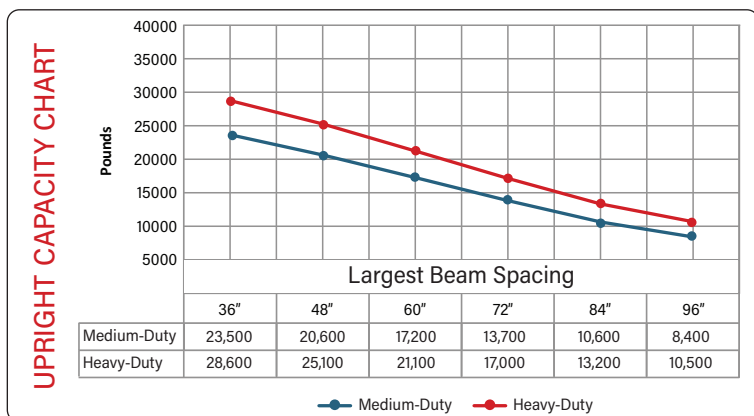

SELECT UPRIGHT FRAMES

Add the following figures:

- Height of pallet loads (including pallet)
- + Height of shelf beam
- + 4" Min. vertical clearance for each pallet load
- Sum of above dimensions = Rack Height

For uppermost load level, location of shelf beam should be 6" less than fork truck's maximum lift height. Top of beams need to be at even increments.

SELECT BEAMS

- Determine load weights per pair of beams (two 2,500 lb pallet loads = 5,000 lb beam capacity)
- Determine length of beam required based on load width and minimum clearances. Minimum clearance between pallets and uprights is 4". (for two 48" w pallets clearance is 12" - use 108" w beam)
- Refer to beam length and select beam with desired capacity. (for 108" beam and 5,000 lb load select beam SON108)

Largest beam spacing has a significant impact on the capacity rating of an upright.

● Lake Green Uprights

	Depth	Height	Type	Capacity per Pair	Item

BUILD YOUR OWN

Easily configure your own pallet rack unit from the listed parts.

Uprights

Roll-form welded uprights are interchangeable with other major teardrop-style products on the market today.

Beams

Each end of the pallet rack beam has studs to engage the heavy-duty metal rack upright slots.

Beams can be adjusted on 2" vertical centers. An integral safety lock automatically locks into place when beam is properly seated.

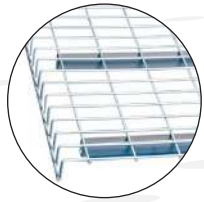

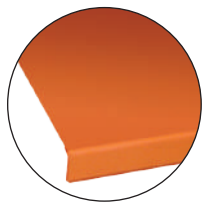

Beams 120" long and greater should be tied together with at least one front-to-back support except when solid or wire decking is used.

NOTE: In the interest of safety, Lyon strongly recommends that racks be floor and/or wall anchored.

TIRE RACK

WHEEL AND TIRE STORAGE

Built from our bulk storage rack, this tire rack is quick to assemble and supports 2,600 lbs per level. Easily store tires and wheels using vertical space so that it doesn't take up too much space on your shop floor. Tire rack ships unassembled.

Unit Includes:

- 2 Bulk Storage Rack Ladder Brace Uprights
- 6 Heavy-duty Beams
- 3 Front-to-Back Supports
- 2 Back-to-Wall Ties
- 4 Anchoring Feet

● Available In DD - Dove Gray

Width	Depth	Height	Capacity per Level	Unit
60"	18"	84"	2,600 lbs	APR9C

GRAVITY FLOW RACK

HEAVY-DUTY GRAVITY FLOW RACK

Built from our bulk storage rack, this heavy-duty gravity flow rack is quick to assemble and supports 3,000 lbs per level. Use this rack for storing heavy automotive components and spare parts efficiently, allowing for easy retrieval and inventory management. Gravity flow rack ships unassembled.

Unit Includes:

- 2 Bulk Storage Rack Welded Uprights
- 8 Heavy-duty Beams
- 4 Gravity Flow Wire Decks
- 4 Anchoring Feet

STANDARD-DUTY GRAVITY FLOW RACK

Built from our rivet rack, this gravity flow rack is easy to assemble and supports 1,000 lbs per level. Use this rack for storing items with quick turnover rates in order picking and retail inventory. Gravity flow rack ships unassembled.

Unit Includes:

- 4 Rivet Rack Angle Post Uprights
- 8 Width Double Rivet Beams
- 8 Depth Double Rivet Beams
- 4 Gravity Flow Wire Decks
- 4 Footplates

SLOTTED ANGLE

LOAD CAPACITY GUIDE

Load capacities for formations illustrated are for your guidance only and include an adequate safety factor. Figures are based on a static load, evenly distributed on a pair of beams which are supported at both ends.

CAUTION: Consideration should be given to additional bracing depending on shock loading, method of handling stock and concentrated loads.

RED: Load capacity of 14-Gauge
BLACK: Load capacity of 12-Gauge

Longest Vertical Distance Between Horizontal Braces*	Uprights (Vertical)					
						
10 ft.	-	-	2,940	3,650	-	5,880
	-	2,520	6,150	8,200	5,040	12,300

Combination sections (channels, T's, etc.) are connected every 6 inches. *Connecting stiffeners are spaced 3 feet apart.

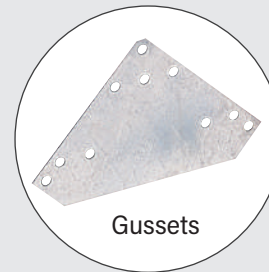

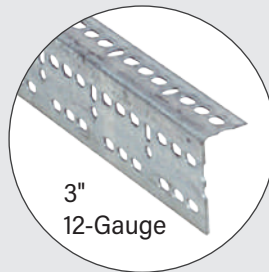

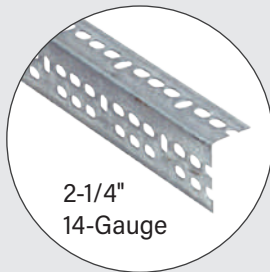

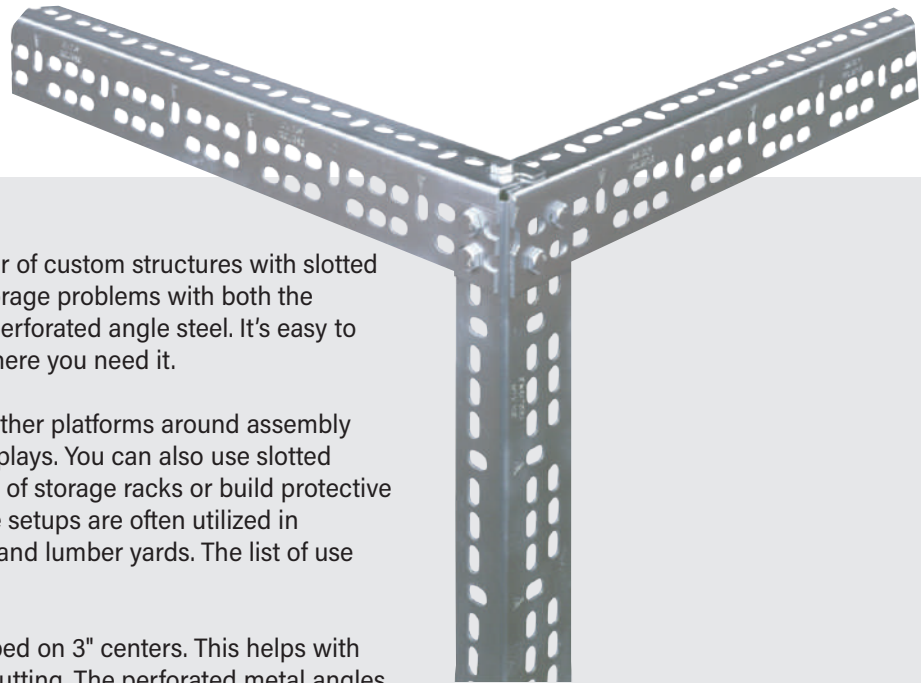

SLOTTED ANGLE

INFINITE POSSIBILITIES!

Create and build an infinite number of custom structures with slotted steel angle. Easily solve unique storage problems with both the convenience and strength of this perforated angle steel. It's easy to build what you need, when and where you need it.

Use this punched angle to make either platforms around assembly projects or support framing for displays. You can also use slotted angle to create non-standard sizes of storage racks or build protective framing around machinery. Unique setups are often utilized in hospitals, museums, retail outlets, and lumber yards. The list of use cases is virtually endless!

Each slotted angle is clearly stamped on 3" centers. This helps with quick and simple measuring and cutting. The perforated metal angles bolt together to form a wide variety of both beam and upright setups. Pieces cut easily with a Sawzall, hacksaw, or miter saw with a metal cutting wheel. Gusset plates provide extra strength at the corners.

APPLICATIONS

High density storage for small to mid-sized items. A variety of drawer layouts ensure a perfect fit for your storage needs.
USE FOR: Storing hardware, tools, or small products.

Available Widths	30"
Available Depths	28-1/4"
Available Heights	33" 44" 60"
Overall Cost	\$\$\$
Assembly	Easy

DRAWER ACCESS

Our stock modular drawer cabinets feature a multiple drawer access which allows you to open several drawers at once. A standard lock at the top of the cabinet can quickly secure all drawers closed at one time. Each lock includes two keys.

FORKLIFT BASE

The cabinet housing includes a reinforced base that also creates a wide opening for forklift access. These modular cabinets are designed to be lifted, fully loaded (7,500 lbs max), by a standard forklift. Use the removable base cover panels for a clean and finished look when the cabinet is in place.

MODULAR CABINETS

MINIMAL STORAGE FOOTPRINT

Our modular drawer cabinets are constructed from high-quality steel, which provides durability and longevity to the cabinets. The steel construction ensures that the cabinets can withstand daily wear and tear, making them a long-lasting investment for your workspace.

Each drawer in our modular drawer cabinets is designed to hold up to 400 pounds, making it ideal for storing heavy-duty equipment, tools, and small parts. The drawers are built with full-extension glides that provide smooth and effortless operation, allowing you to easily access the contents of the drawers.

MODULAR CABINETS | READY TO SHIP

MODULAR DRAWER CABINETS

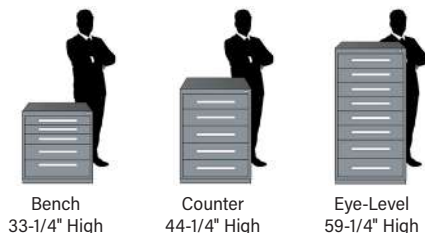

Modular drawer cabinets feature a capacity of 400 lbs per drawer. Multiple drawer access allows several drawers to be opened at one time. The included layout kits help create smaller compartments in each drawer to keep your items organized. Dividers can be easily adjusted to create perfectly sized compartments.

The cabinet can be locked to secure all the drawers closed at one time. The forklift base allows you to easily move a fully loaded cabinet. Front and back covers are included to cover the forklift opening to prevent items from rolling underneath. Cabinets ship assembled.

Ready to Ship Units Include:

- Standard Lock with 2 Keys
- Multiple Drawer Access
- Drawer Layout Kits (partitions and dividers)
- Forklift Base and Base Covers

● Available In DD - Dove Gray

OVERHEAD UNIT

Overhead units feature a flat bottom that attach directly to the top of the modular cabinet below. Available as an open unit for quick access to small to medium sized items. Each overhead includes one shelf that is adjustable on 3/4" centers. The adjustable shelf holds up to 400 lbs and includes a 1" high raised edge on the back and sides. This overhead unit attaches to any standard wide modular drawer cabinet. Overheads ship assembled. *(ships attached to drawer cabinet when ordered together)*

Overhead Unit Includes:

- 1 Adjustable Shelf
- Attachment Fasteners

● Available In DD - Dove Gray

Width	Depth	Height	Adjustable Shelf	Cabinet
30"	28-1/4"	24-7/8"	1	N27303010500N

WORKBENCH KITS

Quickly convert your bench height modular cabinet into a workbench by adding a workbench kit. Kits include a 72" w hardwood top. Available with or without a riser and backstop. Workbench kit ships unassembled. *(cabinet not included)*

● Available In DD - Dove Gray

Width	Depth	Height	Includes	Cabinet

		47"	Hardwood work surface, closed panel leg, adjustable footrest, back stop, 12"h riser	251350WB1019

MOBILE WORKBENCH

This mobile workbench features a latch-in/latch-out system. These latches secure the drawers either fully-closed or fully-open until released. The drawers have a weight capacity of 400 lbs each. A retainer top with a vinyl mat prevents items from rolling off the top of the cabinet. The handle kit and 6" polyolefin casters make it easier to steer the cabinet around your facility. Cabinet ships assembled, handle and casters ship loose.

Mobile Workbench Includes:

- Retainer Top with Vinyl Mat
- Layout Kits
- Handle Kit
- 6" Casters: 2 Fixed / 2 Swivel with Brakes

● Available In YF - Red Baron

MODULAR CABINETS | LAYOUT KITS

LAYOUT KITS FOR STANDARD WIDE CABINETS

Easily add a layout kit to an empty modular drawer to create adjustable compartments. Kits are pre-designed for partitions to be installed at specific segments. Partitions are then secured to the bottom of the drawer with the included hardware.

Dividers can then be set in place. Kit configurations show dividers set with evenly spaced segments, however dividers can be adjusted from front to back wherever they are needed. Easily move, add, or remove dividers as your storage needs change. Both partitions and dividers feature a galvanized finish. Kits ship unassembled.

Layout Kits Include:

- Partitions for 30"d Modular Drawer
- Dividers to Fit Configuration
- Galvanized Finish

PARTITIONS AND DIVIDERS | MODULAR CABINETS

PARTITIONS AND DIVIDERS

Add on to an existing layout kit or build your own custom kit with individual partitions and dividers. Partitions secure into the bottom of the drawer with screws. Add dividers that can be easily adjusted to create the perfect compartment size.

PARTITIONS - 1 Pack

All cabinets use a STANDARD partition when the partition runs front-to-back. Includes hardware to attach to the bottom of the modular drawer. Galvanized finish.

Cabinet Depth	Number of Segments	Approximate Length	Divider 04 & 05 Drawers	Divider 06 & 07 Drawers	Divider 08 & 09 Drawers	Divider 10+ Drawers
Standard 28-1/4"	32	25-7/16"	NF045P30WK	NF067P30WK	NF089P30WK	NF100P30WK

DIVIDERS - 10 Pack

Dividers slip into partition and drawer slots to create smaller compartments. Dividers larger than 14 segments feature a base flange to secure it to the drawer bottom with included screws. Galvanized finish.

METAL STOOLS

WHERE HISTORY MEETS MODERN FUNCTIONALITY

The 1901 Stool features generously sized square seat with rounded corners and a diamond pattern perforation. These stools feature flared legs, making stacking and storing them a breeze. The channel braces on the stools offer stability and double as footrests! Each stool includes a hook that attaches to the inside edge of the seat for hanging bags or purses. Stools are all-welded and finished with our durable powder coat paint finish. Stools ship assembled, hook ships loose.

OPTIONAL ACCESSORIES

For maximum comfort, add the curved steel back. This back has matching diamond perforations as well as an easy grip opening to make moving or carrying the stool easier. Our solid wood seat featuring a warm walnut stain fits neatly on top of the stool and bolts securely in place.

1901 Stools Feature:

- 24" or 30" Height
- 14-Gauge Steel
- Powder Coat Finish
- Diamond Pattern Ventilation
- 500 lb Capacity

- DD - Dove Gray
- YF - Red Baron
- KK - Vulcan Black

HANDLE WITH HASP

To ensure maximum security, Lyon's all-welded storage cabinets feature a 3-point latching system. The cast aluminum handle features an integrated padlock hasp that can secure the doors closed with a user provided padlock.

FORKLIFT BASE

Each cabinet has 4" high legs that are welded directly to the cabinet, serving as a sturdy base. The wide open base allows forklifts to easily transport and maneuver the cabinet to where it is needed within your facility.

ALL-WELDED CABINETS

INDUSTRIAL STORAGE CABINETS

All-welded storage cabinets are built to withstand the toughest storage challenges. These heavy-duty cabinets are constructed from durable 14-gauge steel, ensuring long-lasting durability and reliability.

Hinge plates are welded to each door and feature heavy-duty brass hinge pins to keep the doors aligned so that they close flush and open easily.

Shelves are adjustable on 3" centers, allowing you to customize the interior space to accommodate items of various sizes. Each shelf boasts an impressive payload capacity of 1,450 lbs, ensuring that you can store heavy equipment, tools, and supplies with ease and confidence.

CABINET VARIETY

The all-welded storage cabinets are highly versatile, offering different configurations to meet a wide range of storage needs. Whether you require a combination cabinet with a mix of half-shelves and hanging storage, bin storage cabinets for organizing small parts and components, or a visible door cabinets for viewing items, our all-welded storage cabinets cater to the unique requirements of various industries and applications, providing durable storage solutions.

ALL-WELDED CABINETS | STANDARD CABINETS

ALL-WELDED STANDARD SHELF CABINETS

All-welded cabinets are built with 14-gauge steel construction. The heavy-duty steel doors feature 5/16" brass-pin hinges for smooth operation and precise alignment. A secure 3-point locking system includes a 3/8" latch rod on the right door. The handle includes an integrated hasp to accept a user provided padlock.

Shelves are adjustable on 3" centers, with each one capable of holding a payload of up to 1,450 lbs. The 4" high legs create a forklift base allowing convenient transportation of the cabinet as needed. Cabinets ship assembled.

All-Welded Cabinets Include:

- 14-Gauge Steel Construction
- 1,450 lbs Load Capacity per Shelf
- Turn handle with Padlock Hasp
- 4" High Welded Legs

● Available In DD - Dove Gray

RECESSED HANDLE

The recessed steel handle sits flush with the locker door. The lift handle includes a hasp inside the recessed cup that can be secured with a user provided padlock. Recessed handles are used on single, double, and triple tier lockers with a lockbar.

PULL HANDLE

The steel pull handle includes a hasp that can be secured with a user provided padlock. These handles are found on box locker doors that do not have a moving latching system.

LOCKERS

QUALITY LOCKERS AND ACCESSORIES

Lyon has long been America's leading manufacturer of a complete line of quality metal school lockers and accessories. These metal lockers are perfect for schools, gym locker rooms, and employee break rooms. We have a huge selection of tiers and sizes in both 1-wide and 3-wide lockers. Lyon has been the industry standard for steel lockers for over a century.

All door frame corners are lapped and welded to form a strong, rigid assembly. We construct the doors using one-piece of prime, high grade class 1, 16-gauge steel for extra strength and durability. Our standard steel lockers come with 6" high legs.

Locker doors include louvers for ventilation and are pre-punched to accept a Lyon number plate. Recessed or pull handles can accommodate a user provided lock. Built-in locks can also be installed directly onto each locker door.

LOCKER GROUPS

Standard lockers are available in 1-wide or 3-wide locker groups. 1-wide lockers include two side sheets to enclose the locker. 3-wide lockers include four side sheets allowing the middle locker to share side sheets with both left and right lockers.

LOCKERS WITH LEGS

Standard lockers include 6" high legs integrated as part of the locker frame. These legs provide additional toe room beneath the locker and make it easy to clean beneath the lockers. The rear legs are adjustable to make leveling the lockers a breeze!

LOCKERS | STANDARD STEEL LOCKERS

SINGLE, DOUBLE, AND TRIPLE TIER LOCKERS

Standard steel lockers includes 16-gauge, one piece doors. Lyon laps and welds the door frame corners to create a strong and rigid assembly. The recessed steel handle sits flush with the locker door and can accept a user provided padlock. These lockers feature Lyon's patent pending metal nano-roller latching system and unique lockbar system that engages both the top and bottom of the frame for extra security.

Double and triple tier lockers include an intermediate cross member (ICM) between the locker doors for added security. The 6" wide door louvers provide ventilation for the interior of the locker. The 6" high legs provide additional toe room below the locker door.

Standard Steel Lockers Include:

- 16-gauge Frame and Doors with 24-gauge Body Parts
- Doors Are Punched To Accept A Lyon Number Plate
- 6" Wide Louvers On Top and Bottom of the Doors
- Stainless Steel Recessed Handle with Finger Lift
- 6" High Legs and Adjustable Rear Legs
- Available Unassembled or Assembled

HOW DOES IT WORK?

Any moisture triggers the controlled release of powerful silver ions to provide superior antimicrobial protection for decades. The antimicrobial compound is completely inorganic, less toxic than ordinary table salt, less irritating than talcum powder, and has been approved by the EPA, FDA and NSF for medical devices.

48"	24"	17-3/4"	ADA4824	ADABK4824

BUILD YOUR OWN!

Easily build your own locker room bench with Lyon's bench components. Lyon recommends at least three evenly distributed pedestals for benches 96" long or more. Aluminum pedestals can be used as moveable benches or anchored to the floor. Steel pedestals must be anchored.

Seat Length	Hardwood (use with any pedestals)	Aluminum (use with anodized aluminum pedestals)
	9-1/2"d x 1-1/4"h	9-1/2"d x 1-3/4"

COLOR CHART

Lyon's stocked products are available in Dove Gray unless otherwise noted. Contact your local sales rep to find out about ordering products in any of our 34 premier colors (minimum quantities may apply).

Lyon's premier color selections offer a virtually endless combination of choices. Our preparation and finishing procedures deliver a superior surface, highly resistant to deterioration and corrosion, to create a lasting impression for your locker installation. The below colors approximate the actual color as closely as possible. For a more precise color match, contact Lyon to request a color chip sample.
